

BURKE BUILT QUALITY

We take pride in creating quality products that live up to the Burke Built™ promise and can be enjoyed by communities for years to come.

Made with Pride in the United States*: Others may be content to outsource their manufacturing, but we believe the best way to ensure the highest quality is to build our playgrounds here in the heartland, using American engineering, craftsmanship and materials.

Turn Key Service: Your Burke Representative will take care of anything from full installation to support for your own crew. And when you need service, you'll get a real person who'll already know your system and get your problem fixed in days, not weeks.

Total Cost of Ownership Package™: The most important "package" included with every playground we ship is one you can't even see. We call it our Total Cost of Ownership Package and it's your assurance that no playground offers a lower true cost than a playground from Burke. So what exactly is in this package? Exceptional Burke Built quality, superior materials, non-prorated Generations Warranty™ and value added resources.

Value Added Resources

BCI Burke truly gives you the most value for your money. We offer value-added resources FREE with every playground purchase including a National Program for Playground Safety (NPPS) Playground Supervision Kit, a Customized Maintenance Kit and Intensity® Fitness Curriculum.

**Burke sources a few raw materials and parts from foreign vendor partners. The vast majority of Burke's products, however, are manufactured in America's heartland and all products are distributed from Burke's headquarters in Fond du Lac, WI USA.*

BURKE BUILT QUALITY

KoreKonnnect® Direct-Bolt Clamp System: Nucleus and Voltage feature our Industry-leading KoreKonnnect direct-bolt clamp system resulting in the strongest and most accurate connection system ever. Factory located connection points make for easy, precise installation and an error-free fit. Best of all, KoreKonnnect is covered for 100 years under our non-prorated Generations Warranty™.

Direct-Bolt Connection System: Intensity and Little Buddies® feature Burke's trusted direct-bolt connection that uses a durable, straightforward direct-bolt system to ensure a trouble-free installation and provide the necessary strength to accommodate the demands of playing children. Like our KoreKonnnect system, Direct-Bolt connections are covered for 100 years under our Generations Warranty.

EZKonnnect® Deck Mounting System: Our exclusive self-leveling deck attachment and factory CNC construction allows for faster and more precise location of decks during installation. The 2-bolt per corner deck attachment increases overall structure strength and stability.

Platforms: Burke's oversized non-slip platforms are constructed of heavy-duty punched steel that can support more than 2 tons. Our vinyl coating is California compliant, free of lead and other hazardous heavy metals.

Tamper-Resistant Stainless Steel Hardware: All hardware is covered for 100 years under our Generations Warranty.

Premium Powder Coatings: Our industry-leading powder coatings and finishes prevent fading, last longer and deter rust. We also offer a "coastal package" powder coat system. This special powder coat system for metal components and upright posts will provide additional corrosion and chemical protection along with added longevity to the color and gloss retention of the powder coated parts. Contact your Burke Representative for more information on colors, price and warranty.

Compound Plastics with UV-15: You'll get long wear and bright, vibrant colors that hold up for years thanks to our thick, durable rotomolded plastics with UV-15 protection. This is why we can cover them for 15 years under our non-prorated Generations Warranty.

Climbing Cables: Our climbing cables are flexible enough to provide movement, yet strong enough to last. Our ropes are made from 6 polyester cords with steel reinforcement wrapped around a synthetic fiber core. Each cord contains 8 galvanized steel strands tightly covered with polyester multi-fibers. Our RopeVenture™ cables consist of 6 strands, each containing 24 stainless steel reinforcing strands within a nylon sleeve, wrapped around a solid nylon core.

Aluminum Connectors: Swivel connectors at the end of our ropes allow assembly at any angle with no unwanted twists in the net. The aluminum fittings used to secure the joints are swaged in place to prevent any movement between the rope and fittings that could cause wear.
